#### **Kemarks**

The figures of births and deaths shown in this statement for week ending the 7th May, 1955 relate to 184 towns with an estimated population of 26,068 thousands. The total number of towns is 300 and their population is 38,988 thousands. Thus 61% of the total number of towns representing 67% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 13,419 and 6,301 representing birth and death rates of 26.8 and 12.6 per thousand of population respectively.

(a) States (Part A and Part C).—The data here relate to 163 towns with an estimated population of 22,914 thousands. Information about Ajmer, Bhopal, Bihar and West Bengal could not be included. The total number of towns is 252 and their population is 32,572 thousands. Thus 65% of the total number of towns representing 70% of the total population is covered. The number of births

and deaths recorded in these towns were 12,228 and 5,649 representing birth rates and death rates of 27.7 and 12.8 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B).—The data here relate to 21 towns with an estimated population of 3,154 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 44% of the total number of towns representing 49% of the total population is covered. The number of births and deaths recorded in these towns were 1,191 and 652 representing birth and death rates of 19.6 and 10.7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
